

ELAINE DAILY

Elaine Daily is a former cardiac critical care nurse who currently works as a consultant and educator in critical care and disaster health care. She has authored several books on hemodynamic monitoring and cardiovascular procedures. She also is the co-author of the textbook, *International Disaster Nursing*, and the co-editor of the annual nursing supplement to *Prehospital and Disaster Medicine*. Ms. Daily was one of the founding members of the WADEM Nursing Section and served as its first chairperson, leading the section in the development of its current bylaws and strategic planning. She is a Fellow of the Society of Critical Care Medicine and the American Heart Association.
